

Trying to Reduce Sugar Costs?

The **SugarShot 2.0** can help!

According to the National Coffee Association, over half of consumers sweeten their coffee. Among sweeteners, sugar is the most used with approximately one-third of consumers preferring this option. For a successful coffee program, there is no question that sugar needs to be readily available for your guests.

Our research shows that when offering sugar in packets or canisters, 35-50% of the product goes to waste. The **SugarShot 2.0** portion-control sugar dispenser reduces this waste by controlling both usage and pilferage. The amount of money you will save on sugar alone will allow you to start seeing a return on investment in six months to two years, depending on coffee sales.

The **SugarShot 2.0** offers the following additional features and benefits:

ACCURATE SUGAR DISPENSING

- Guests get the right amount of sugar each time, and operators control sugar usage and cost.

COMPACT FOOTPRINT (6 INCHES)

- Takes up minimal space on the coffee bar.

16 LB. SUGAR CAPACITY

- A large capacity means less refills for employees.

AUGER TECHNOLOGY

- Sugar clumps don't stand a chance. The auger always delivers the correct amount of sugar.

EASY-TO-USE BUTTON PANEL

- A single touch of a button creates most beverages - including those requiring half, single, and multiple packets of sugar.

EASY-TO-REMOVE PARTS FOR CLEANING

- Parts can be removed without tools.

NO MONTHLY TUBE CHANGE

- This dispenser is easy and affordable to maintain.

PROGRAMMABLE

- Software updates and menu changes via USB are a breeze.

GENERAL SPECIFICATIONS - (MODEL AC1-GP-1)

Sugar Capacity: 16 lb. / 7.3 kg

Power Requirements: 120V AC, 60Hz, 0.6A, 1ph

Dimensions (LxWxH): 19" x 6" x 25.5"
